

FRAUD PREVENTION EXCHANGE

A powerful industry collaborative combined with TransUnion's entire network of available customer data. Gain a full industry view with flags for suspect ID elements and indications of suspect activity before margins are impacted.

THE FRAUD PREVENTION EXCHANGE FORTIFIES YOUR EFFORTS BY:

- ⌚ Supporting multiple calls for alerts: First when an application is initiated and again when the application is completed and it's clear the consumer has a strong intent to accept an offer
- ⌚ Providing multi-factor analysis for entity match, including device and identity elements
- ⌚ Offering full integration with our Digital Verification capabilities, giving lenders greater visibility into devices, web browsing behaviors and digital identities
- ⌚ Securely hosting data accessed via TransUnion's restful API

TRANSUNION FRAUD PREVENTION EXCHANGE

We offer unparalleled data that goes beyond just that of the Exchange to encompass TransUnion's full network of available customers. This powerful combination of data enables you to more effectively mitigate fraud risk at the point of origination.
